**EQUITY
SAVINGS**

(An open ended scheme investing in equity,
arbitrage and debt)

FUND

*“Protect the downside;
the upside will take care of itself”*

– Richard Branson, Virgin Group Investor

quant Equity Savings Fund: NFO Opens: July 07, 2025

Synergistic portfolio across **Equity, Arbitrage and Debt**

quant[®]
**EQUITY
SAVINGS**
FUND

STRATEGIC EQUITY/DEBT

PERFORMANCE CONSISTENCY

LIQUIDITY MANAGEMENT

ENHANCED PORTFOLIO STABILITY

BALANCED RISK-RETURN

TAX-EFFICIENT RETURNS

- Risk and return are **closely related**
- A well-constructed asset allocation strategy helps balance this relationship, **aligning your investments with your financial goals**
- By spreading investments across long equity, arbitrage and debt, asset allocation aims to **reduce overall portfolio volatility and supports disciplined, long-term investing**

In addition to managing risk, asset allocation can potentially offer:

- Portfolio stability
- Performance consistency
- Tax-efficient returns
- Good liquidity

In short, **asset allocation is a powerful tool to help you stay on track regardless of market conditions**

Asset allocation is the process of diversifying your investments across different asset classes such as equity, fixed income and others; each with distinct risk and return profiles

- A hybrid fund that aims to **provide moderate returns with lower volatility** by investing in a mix of equity, arbitrage and debt instruments
- **Dynamically rebalances its allocation between equity, arbitrage and debt** based on prevailing market conditions to help **eliminate emotional and behavioural biases**
- When **equity markets display high volatility**, the fund **typically reduces directional equity exposure** and increases allocation to arbitrage and fixed income to suit **risk averse investors**
- Conversely, **when equity valuations are attractive**, **directional equity exposure will rise by pruning** arbitrage exposure and debt exposure
- Even duration risk will be avoided for debt exposure, by taking shorter-end of the yield curve **for better risk-adjusted returns across market cycles**

Asset Mix

- **Equity:** For growth opportunities
- **Arbitrage:** Risk free returns during volatile phases
- **Debt :** For stable income with ample liquidity
- **Hedging:** Overall portfolio can be further protected by using derivative instruments to hedge the portfolio during risk aversion and volatile phases

Asset allocation under normal circumstances – Stable Market

Equity Exposure
(65-90%)

Growth potential

**Hedged Equity &
Arbitrage Exposure**
(25-80%)

Hedging benefits + Risk free income

Debt Exposure
(10-35%)

Stable Income

Gross Equity Exposure \geq 65% for equity tax advantage*

Our Strategy – Net Equity Exposure Capped @ 40%

Predictive Analytics monitors
market trends to determine
optimal asset allocation

Asset allocation during volatile markets – Risk Averse

Equity Exposure
(65-90%)

Growth potential

**Hedged Equity &
Arbitrage Exposure**
(55-80%)

Hedging benefits + Risk free Income

Debt Exposure
(10-35%)

Stable Income

Gross Equity Exposure \geq 65% for equity tax advantage*

Our Strategy – Net Equity Exposure can drop upto 10%

*Subject to prevailing tax laws. The defensive allocation under volatile markets will be made keeping in view the interest of the unit holders. Such position will be closely monitored by the Money Managers and necessary rebalancing will be done at suitable opportunity but not later than 30 days.

Equity Exposure

Growth potential

**Hedged Equity & Arbitrage
Exposure**

Income accrual and volatility hedge

Debt Exposure

Stable Income

Rising Market (Net equity exposure capped @ 40%)

Flat Market (Net equity exposure range will be 15-20%)

Falling Market (Net equity exposure can drop up to 10%)

Gross Equity Exposure \geq 65% for equity tax advantage*

**Predictive Analytics monitors
market trends to determine
optimal asset allocation**

*Subject to prevailing tax laws. The defensive allocation under volatile markets will be made keeping in view the interest of the unit holders. Such position will be closely monitored by the Money Managers and necessary rebalancing will be done at suitable opportunity but not later than 30 days.

Fund Positioning

- An “all-weather” scheme with moderate risk and a tax efficient alternative for risk-averse investors, including first time equity investors/investors migrating from fixed deposits, seeking lower volatility

Fund Strategy

- Equity portion of the schemes will be managed like a flexi cap investment strategy with a large cap bias, dynamically rebalancing between equity, arbitrage and debt
- Focus on delivering superior risk-adjusted returns with lower drawdowns during market corrections through dynamic asset allocation and hedging
- In rising market environment, the scheme will have maximum 40% net equity exposure, arbitrage exposure between 25-80% and debt exposure between 10-35%
- During risk-averse or falling market situations, the scheme can increase equity arbitrage and or hedge exposure and net equity exposure can drop up to 10% with an aim to protect capital and reduce volatility of the portfolio
- Portfolio will be diversified across asset classes, market caps and sectors with regular rebalancing based on ‘Predictive Analytics’ and the VLRT Framework
- Dynamic rebalancing with the help of derivative instruments viz., arbitrage and hedging tools including writing call options, particularly in flat market

Equity

Global & domestic macros
Geopolitical situation
Business environment

Arbitrage

Attractive spreads
Opportunities during volatility
Risk-free returns

Debt

Global & domestic macros
Interest rates & inflation
Focus on short duration
Liquidity is the key

Diversified Portfolio with Balanced Risk-Return

Invests across multiple asset classes offering a diversified portfolio in a single scheme to reduce the overall volatility of the fund. Ideal for investors who want diversified exposure without having to manage individual asset classes on their own

Suitable for Long-Term Goals

A combination of stability and growth helps Investors with a long-term financial goal to save for buying a home, saving for children's education or building a retirement fund in the long term

Exposure to Equity with Reduced Drawdowns

While equity offers the potential for higher returns, they also come with higher drawdowns during market crashes. The scheme helps reduce drawdowns by balancing the portfolio with safer investments like debt and arbitrage

Liquidity

quant Equity Savings Fund offers good liquidity, and is ideal for investors who need flexibility in accessing their funds

Expert Market Timing

quant Equity Savings Fund takes advantage of market inefficiencies through our Timing Analytics (VLRT Framework) and does not require the investor to time the market. The money managers handle the execution of multiple asset strategies, which makes them appealing to those who are not actively involved in managing their investments

Potential for Arbitrage Gains

The arbitrage strategy used by the fund takes advantage of pricing inefficiencies in equity markets, generating returns with relatively low risk and adds another layer of stability and returns to the portfolio, as arbitrage opportunities typically arise during market volatility or inefficiencies

DYNAMIC REBALANCING

quant pursues global research with a focus on financial markets and the real economy which includes the real economy and leveraged economy. We place a large emphasis on the role of participants' behavior. This idea has evolved into a multi-dimensional research perspective which is now formulated in our VLRT framework.

In a dynamic world, it is not just a choice but a necessity to adopt a multi-dimensional approach

The world is becoming non-linear and parabolic and to stay relevant, money managers must think with an unconstrained mind, actively update their methods and earnestly search for absolute returns, considering all markets and asset classes

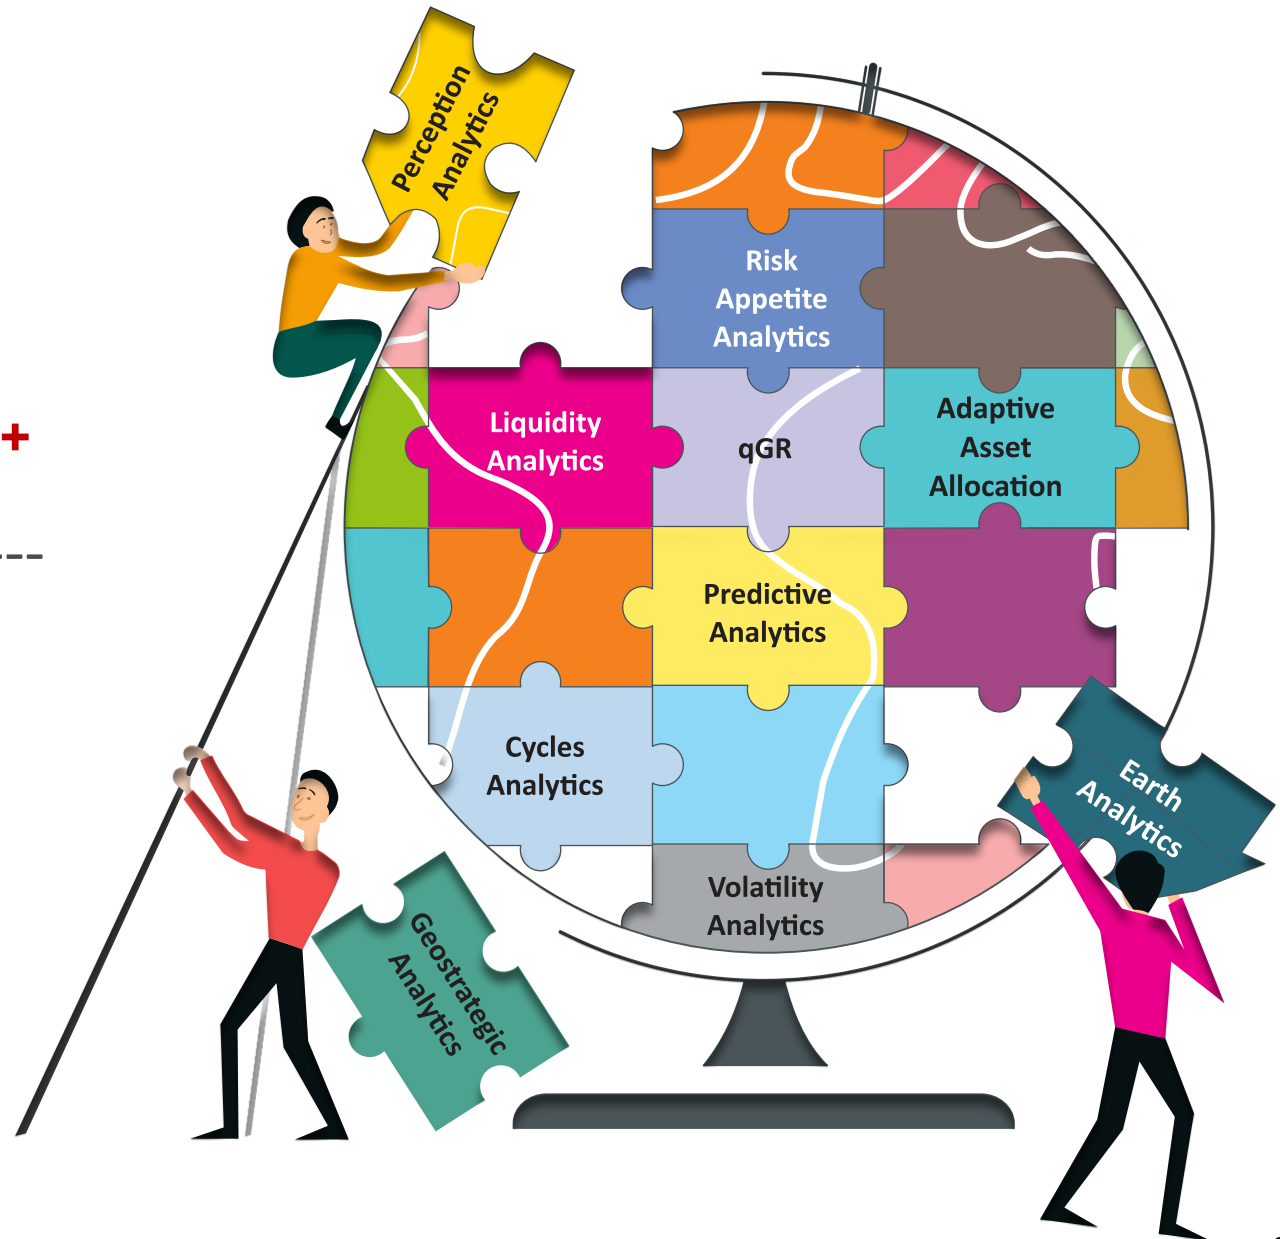

“Analysis Adds Up”

We believe safeguarding investor wealth is paramount. Apart from reducing risk by investing **across asset classes**, we take diversification to another dimension by ensuring every investment decision comes from a focused discussion between **investment managers, research analysts and analytics team – each with diverse sets of capabilities and experiences**

**Sandeep Tandon | Founder & Chief Investment Officer**

Sandeep is the Founder & Chief Investment Officer of the quant Money Managers, which has grown to an AUM of over INR 80,000cr from under INR 200cr in just four years. Sandeep has built the mutual funds business from grounds up, honing a culture of excellence and innovation. His entrepreneurship skills have stood up a mutual fund, which has captured the imagination of the modern investor base, and reached out to the length and breadth of vividh Bharat, now totaling over 8 million folios. He has channeled his vast experiences, interests and novel thinking into building the predictive analytics framework and the dynamic VLRT investment framework of the quant group. It is these frameworks coupled with his deep understanding of various asset classes at a global level, including, credit, commodities, equities and now digital currencies that enables Sandeep in definitive identification of market inflexion points and arriving at conclusive micro and macro calls.

Sandeep's credentials as a global macro strategist are well established. As a behavioral house, quant engages multiple proprietary indicators and believes in study of cycles to find inflexion points, using predictive analytics. Sandeep has a strong belief in quant Group's role as a knowledge partner in creating awareness about latest developments in investment philosophy and ideas, such as behavioral research. It is for this reason that he believes investor education is of utmost importance and the group, under his leadership, has undertaken many initiatives in this regard. Based on this belief Sandeep authored a book titled 'Being Relevant' which was published in May 2019. This book builds on research covering decades, even centuries of data points, distilled through quant's VLRT framework and predictive analytics indicators. The book further outlines the potential trajectory for the world in the coming decades that can help money managers and investors prepare for volatile times, which will upend the conventional analytical methods and beliefs of the past decades.

Sandeep has vast experience of over 30 years in the capital markets. His journey in the money management business started in FY 1992-93 with GIC mutual fund (a JV partner with George Soros in India) where he was a trainee. He later joined IDBI Asset Management, where he was a founding member and was part of the core team that initialized the asset management business. He played a key role in devising, conceptualizing and marketing one of India's most successful mutual fund schemes: IDBI I-NITS 95. Furthermore, Sandeep worked in pivotal positions at several reputed financial services firms including ICICI Securities (a JV partner with J P Morgan in India), Kotak Securities (a JV partner with Goldman Sachs in India) and REFCO (erstwhile global derivatives firm). He has also worked at the Economic Times Research Bureau (a research wing of Bennett, Coleman and Company Limited).

**Ankit Pande, CFA | Money Manager**

Ankit has an experience of over 12 years in Indian equities and over 3 years in software products. He started his career in core banking software with Infosys' Finacle, nurturing the product with large banking clients in APAC and small and mid-sized banks in India. He then moved in to equity research, along the way picking up the (U.S. based) CFA charter and a masters in business administration from The Chinese University of Hong Kong in 2017, being placed on the school's Dean List. He won the Thomson Reuters StarMine Award for best stock picker in the IT sector in 2014 and is a lifetime member of the Beta Gamma Sigma academic honour society. Over 2015-2019, Ankit ventured into seed stage fund raising, equity sales & relationship management in APAC. In his spare time, Ankit likes to read books on business cycle theory, macroeconomics & geopolitics.

**Sanjeev Sharma | Money Manager**

Sanjeev brings along a rich and diverse experience in the Capital Markets of over 18 years to his role of a Money Manager. He has obtained an M.Com, PG Diploma in Business Administration (Finance) and Certified Treasury Manager (Forex & Risk Management). He has been associated with various schemes of quant mutual fund since 2005. Sanjeev specializes in analysis of credit risk and is responsible for monitoring and assessing investment opportunities across asset classes. He has a deep understanding of macroeconomic policies and its impact on the credit markets. Over the years, Sanjeev has built formidable relationships with key treasurers in the industry. In his spare time, Sanjeev enjoys reading, listening to music and traveling.

**Harshvardhan Bharatia | Money Manager**

Harshvardhan brings valuable experience in trading global fixed income products, including Secured Overnight Financing Rates (SOFR), Federal Funds Rates (FFR), and Treasury Bonds, from his time at Axxela Research and Analytics. Holding a degree in finance, he leverages various analytical tools to mitigate portfolio risks while maximizing returns. With over a year of experience in the quant MF investment team, Harshvardhan has honed his expertise in credit risk evaluation and interest rate management, skills he uses to strategically position the portfolio for optimal performance. He has completed CFA Level – 1 and holds a degree of Bcom (Honours) in Finance.

**CA. Varun Pattani | Money Manager**

Varun is a Chartered Accountant and after working briefly at an investment advisory firm, joined quant Mutual Fund in May'21 as an Investment Analyst. With a strong commitment to a sector-agnostic learning approach, he is deeply passionate about identifying investment opportunities and his analytical acumen and forward thinking approach has consistently delivered results. Over the past five years, Varun has cultivated a comprehensive and multi-dimensional expertise in active fund management. His skill set includes macroeconomic research, sector and stock analysis, money flow assessments, primary market deal evaluations, and decoding medium to long-term market cycles using historical and macroeconomic data.

**Ayusha Kumbhat | Money Manager**

Ayusha has been working at quant Mutual Fund as a Research Analyst for the past 15 months, specializing in investment research, economics and strategy. Her strong analytical foundation and quantitative expertise have significantly contributed to the fund's in-depth economic and strategic investment analysis. She has also led engagement initiatives with portfolio companies to inform investment decisions and has effectively utilized data and AI to enhance processes. Ayusha has completed all levels of the CFA examination and holds a BSc (Hons) in Economics from the University of Warwick, along with an MSc in Behavioural & Experimental Economics from the University of East Anglia.
